**Topic:** The cataclysm of realities: Heroes in decline and the ascendancy of Loki's Multiversal Empire

**Committee:** Marvel and DC

**Topic:** The cataclysm of realities: Heroes in decline and the ascendancy of Loki's Multiversal Empire

**Director:** Juan Manuel Ramírez Tosca

**Moderator:** Ricardo Adrián Arriaga Huerta

## **I. Committee Background**

The Marvel and DC Multiversal Committee was formed by Doctor Strange (Earth-199999) after catastrophic events caused by The Scarlet Witch (Wanda Maximoff). Wanda's grief over losing her children led her to use the Darkhold, a powerful book of dark magic, which gave her the ability to manipulate reality and travel between universes. However, the Darkhold's corrupting power consumed her, making her believe that the only way to reunite with her children was by forcibly traveling across the multiverse.

To achieve infinite freedom of travel between universes, Wanda needed the help of America Chavez, a young girl with the ability to cross dimensions. However, America was unable to fully control her powers, making her an unwitting tool in Wanda's reckless pursuit of her goal. This desperate quest caused widespread destruction, killing numerous individuals and threatening multiple timelines, creating a multiversal catastrophe.

This devastation was the primary reason for the formation of the committee, but it was also a kind of Spider-Man who visited Doctor Strange to warn him briefly about the dangers of the multiverse and the consequences these could have. Initially, Stephen dismissed him as a lunatic seeking attention. But the conversation haunted Strange, who couldn't shake the feeling that there was more to the warning than he had realized.

After the catastrophic events caused by the Scarlet Witch, Doctor Strange (Earth-199999) began assembling the Marvel & DC Committee to prevent

further multiversal chaos. Determined to keep things from spiraling out of control, he gathered some of the greatest minds and most powerful heroes from countless universes, all united by common goals. Together, they defined the committee's main purpose: to preserve the timelines, essential for the survival of millions, and to prevent catastrophic events like universes colliding or entire realities being destroyed due to wrong decisions or emerging threats. Their goal was to maintain balance in the multiverse, ensuring that every universe had protection from multiversal challenges.

Some of the committee's greatest achievements are:

- The Devourer of Worlds' Rampage (Marvel Universe): Galactus and his herald grew stronger by consuming worlds with advanced civilizations. This allowed him to travel between universes. Heroes intervened before his rampage escalated.
- The End to Darkseid's Search for the Anti-Life Equation (Earth-22, DC Universe): On Earth-22, every mistake had significant consequences. Darkseid was about to erase humanity with the Anti-Life Equation. The MARVEL & DC Committee gathered local heroes to stop him.
- Darkseid's Universe-Threatening Mistake (Earth-55, DC Universe): Darkseid created a techno-organic virus within Cyborg, which spread to Earth. The virus infected anyone in contact with technology. The MARVEL & DC Committee contained the outbreak before it spread further.

Note: For this committee, discussions, solutions, and references should be based strictly on the MARVEL and DC content. The following are the key titles to reference:

- Marvel Content:
  - Loki (2021, Disney+)
  - Doctor Strange (2016)
  - Doctor Strange in the Multiverse of Madness (2022)
  - Avengers: Endgame (2019)
  - Spider-Man: No Way Home (2021)

- Thor: Ragnarok (2017)
- DC Content:
  - Crisis on Infinite Earths (Arrowverse Crossover, 2019–2020)
  - The Flash (2014)
  - Justice League Dark: Apokolips War (2020)
- Additional Content:
  - X-Men: Days of Future Past (2014)
  - The Sandman (2022, Netflix)
  - Star Trek: Into Darkness (2013)
  - Deadpool 2 (2018)

These movies are not obligatory, but they provide the bases for a better debate. We also encourage you to inform yourself outside of these movies. If your character does not have a visual representation in the movies or shows, you should research their depiction in comic books or other media sources.

## **II. Topic Information**

Loki the Guardian of the Multiverse, tasked with protecting the different universal branches, found himself increasingly curious about the concept of happiness. In his own universe, happiness had always seemed like an impossible option, a dream.

Driven by a deep sense of longing, he began to experiment by traveling through countless timelines, looking for a version of himself where happiness might be achievable. But no matter how many universes he visited, or how many timelines he explored, he discovered that happiness has never and will never be an option for him.

Blinded by his desire for something he could never have, Loki failed to consider the consequences of his actions. His “innocent” experiments among universes and time lines created a crisis he could’ve never predicted.

Across the multiverse, the Loki variants began to sense a powerful presence, eventually discovering that Loki, the Guardian of the Multiverse, was

traveling between timelines. This raised the curiosity of the different variants, and as they learned of his immense power, a desire to obtain that same strength grew among them. Each variant became convinced that such power was destined to be in the palm of his hand. Preparations for a monumental war to determine who would be crowned "the god of everything" began. Fully aware of the existence of the multiverse, they understood that this would not be a small battle. It would evolve into a multiversal war "Lokis" versus "Lokis."

Loki the Guardian of the Multiverse saw what his curiosity had caused big repercussions on a multiversal scale. And now it's his job to fix this, so he decides to gather the help of some of the most powerful heroes.

Many timelines are being wiped from existence thanks to this fight for power, Loki variants from across the multiverse keep putting at risk many aspects, ranging from civilians, important people of many worlds, lives of heroes and villains but most importantly, time lines. This fight is a multiversal level threat, many universes could collide and a high level of danger in streets of many universes which might not have the level of protection others have. And there might not be enough heroes, or strong/fully developed heroes. Giving a higher level of danger in some universes than in others.

There are many positions and perspectives on this problem, as many universes are being mixed between each other.

The heroes see this as it is, an issue in which they want to keep their world, beloved ones, and their cities safe against any sort of damage since they know they are the only ones able to do so.

Many heroes from different universes and fighting styles will have to collaborate to finally put an end to everything to live in peace once again to stop the destruction of many worlds, universes, and timelines.

### **a. History of the Topic**

While Loki the Guardian of the Multiverse is controlling all of the universes after some years, he realizes that he has never been truly happy, so he started to play with many multiverses and time lines in order to see if this happiness was possible. Doctor Strange knew that something like this was likely to happen, so he gathered every superhero from a parallel universe to stop something like the events the Spider Man warned him about from happening. He replaced the heroes with weak clones so the villains from that universe wouldn't suspect, and the heroes could have a meeting about this catastrophe.

Every Loki variant from other universes somehow found out that one of them (Loki the Guardian of the Multiverse) had the power to control many multiverses in his hands, and they thought that they were capable of doing the same, but they realized that they couldn't do it alone and they required the help from their respective universe. While each Loki variant gathered villains from their respective universes, each one of them realized that there were no superheroes to stop them.

While hopping between universes, they saw the other universes ruled by Lokis that had the same plan and are doing the same, this endangered the possibilities of them becoming the god of everything so they started their plan to attack each other's universes and the villains. Each Loki variant gathered does not go unseen, they get caught in the fight causing even more chaos. With all of this, innocent lives were put at risk.

Loki, the Guardian of the Multiverse, realizes his mistake and tries desperately to fix it all by himself, but seeing that all his effort is in vain, he decides to finally contact Doctor Strange to put an end to this mess once and for all.

## **b. Current Issues**

Millions of timelines keep being destroyed thanks to the fight for the title of “The god of everything”. The multiversal variants of Loki keep fighting among themselves, putting Trillions of lives at stake, this including villains and civilians unconsciously and unleashing chaos across the universe, since they are so blinded by the fight for the throne and power.

This concerning event was seen as a great opportunity for many villains across the multiverse. Villains started going to new universes, planning to conquer them as well. Loads of worlds are losing their freedom and their rights to make decisions for what surrounds them, all this because of a decision made by a superior being.

Many branches from each universe are being created, overloading the TVA system and with many superior beings not knowing what to do, to not go back to old habits and erase those branches, killing many innocent people in the process.

Many powerful entities saw this as a big problem for the mere future remembering the events in relation with Spider-Man in Earth-199999 almost causing the clash of many worlds. Seeing the similarities between these events, and knowing that what Prime Loki caused, could go even further. They decided to intervene.

Seeing as Dr. Strange had already gathered a team of heroes to help end this madness, they knew that this powerful team of multiversal heroes could end this.

This team will discuss many solutions to the problem, to try and figure out how to end it. There is a quite large variety of heroes with different powers and abilities.

And so, it will be their job to save the multiverse and get things back to normal.

### **c. Bloc Positions**

- Doctor Strange (Earth-199999): While studying the ancient arts of magic, Doctor Strange was called upon by Loki the Guardian of the Multiverse for help. Upon witnessing the magnitude of the multiversal crisis unleashed by Wanda's actions, he realized that this battle would determine the fate of the multiverse. He became convinced that the outcome of this conflict would either save or irreparably destroy the fabric of reality itself.
- Iron Man (Earth-400): His universe was one of the affected ones, and now he, along with other heroes, is fighting to protect it. His story follows the events up to Avengers: Endgame, with one crucial difference, he survived after using the Infinity Gauntlet.
- Captain America (Earth-400): Captain America was called upon alongside Iron Man to join the fight. True to his heroic values, he is determined to protect the multiverse from collapsing, knowing the stakes are higher than ever. His history follows the events up to Avengers: Endgame, where he returned the stones, but unlike his original timeline, he chose not to stay in the past with Peggy and instead continued to serve as a protector of the multiverse.
- Wally West (Earth -1): Wally West, a speedster from the DC universe, was chasing one of his enemies through the city when his world collided with another. Knowing he has to protect his loved ones and city, Wally joins the fight to stop the multiverse from falling apart. His speed and drive make him an important part of the battle.
- Superboy (Earth-0): He was hanging out with other young heroes when suddenly, thousands of screams echoed from the streets. Looking out, he saw the horrifying sight of his world colliding with others, and villains flooding the streets. Remembering what his father would have wanted, Superboy knew he had to join the fight alongside other unknown heroes to protect the city.

- Wolverine and Deadpool (Earth-10005): While carrying out some "heroic" deeds, their world suddenly shook violently. They immediately realized something was wrong. Turning their heads, they saw wave after wave of unknown people being thrown into their universe. With their past experience in dealing with chaotic events, they knew they had to join the fight to stop another attempt to destroy their world.
- Scarlet Witch (Earth-400): After breaking free from the Darkhold (in this universe, her death never occurred), Wanda became a new and better person and hero. She redeemed herself following the events of WandaVision. One day, while at the Avengers HQ, a sudden wormhole pulled her out of her universe and into another. Realizing what was happening, she quickly understood the gravity of the situation and joined forces with the Avengers she encountered in this new universe.
- Thor (Earth-199999): After taking a break from past events, Thor was caught off guard when numerous individuals began appearing out of thin air. Realizing something was wrong, he immediately searched for the other heroes, only to discover that some of them had been lost in another universe.
- Miss Martian (Earth-16): While fighting Brainiac, Miss Martian's world collided with another universe. She saw unfamiliar buildings, people, and, most importantly, heroes she had never encountered before. Knowing that the threat was much bigger than her world alone, she joined forces with the new heroes to protect both her universe and the others.
- Captain Marvel (Earth-19999): She was in outer space, solving problems on distant planets, when suddenly she found herself no longer in space. Instead, she was in a room with other heroes and Loki the Guardian of the Multiverse. There, she learned about the situation and understood what was needed to protect the multiverse.

### **III. Conclusion**

To conclude, Loki the Guardian of the Multiverse's search for happiness causes chaos across the multiverse. His actions bring out darker versions of himself and villains, all aiming to control the multiverse. As the threat grows, it's clear that no one can stop it alone. Realizing how much damage he's done, Loki understands that his pursuit of happiness has gone too far. In the end, he reaches out to Doctor Strange, knowing they need to work together with both heroes and villains to fix everything and protect the multiverse.

### **IV. Essential Questions**

1. What is your character's relationship with the multiverse?
2. Should a single entity, such as Loki the Guardian of the Multiverse, hold absolute control over the timelines, or is this power too risky?
3. Would it be better to distribute the responsibility of preserving multiversal balance among multiple heroes or entities?
4. How can this committee impact other beings and timelines? Both positively and negatively.
5. Can an alliance between heroes remain sustainable in the long term? What obstacles could challenge its success?
6. What strategies or measures can heroes adopt to effectively prevent future multiversal crises?
